Lamin Foday

React & Next.js Developer Baku, Azerbaijan, relocating to Dubai, January 2027

molamikedevs@gmail.com | molamikedevs.com | github.com/molamikedevs | linkedin.com/in/molamikedevs

Summary

React and Next.js developer who builds and ships full-stack web applications with TypeScript, Supabase and PostgreSQL. Self-taught, with strong fundamentals in JavaScript, object-oriented programming and software architecture, and a workflow built on feature branches and pull requests. Most recent product: Dersly, a live learning platform used by my own English students. Open to junior developer roles, remote or on-site.

Technical skills

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui
State and data: TanStack Query, React Hooks, custom hooks, Context API, REST APIs
Backend: Supabase (Auth, Postgres, Row Level Security), PostgreSQL, Appwrite, MongoDB
Tools: Git, GitHub (feature branches, pull requests), Vercel, Vite, pnpm, Figma, Claude Code

Projects

Dersly

Live demo, no signup: dersly.pro/demo/teacher

Next.js, TypeScript, Supabase, Tailwind CSS, shadcn/ui, Vercel

- Designed, built and launched a learning platform for my own English students, where they get homework and materials and take a placement test that sets their level.
- Built the teacher side for managing students, groups and assignments, with separate teacher and student access on Supabase Auth and Postgres.
- Shipped version 1 to production on a custom domain and continue to release fixes and features through pull requests.

Estatly

Live demo, no signup: estatly-three.vercel.app/login?demo=admin

React, TypeScript, Vite, Supabase, TanStack Query, Tailwind CSS, shadcn/ui

- Built an internal property management platform for real estate agencies with role-based permissions and a property approval workflow.
- Enforced every permission with Postgres Row Level Security and validated forms with Zod in the browser and on the server, so hiding a button is never the only guard.
- Implemented server-side filtering, sorting and pagination, optimistic updates with TanStack Query, and a dashboard powered by Postgres functions.

TinyMoviez Dashboard

tiny-moviez-five.vercel.app

Vanilla JavaScript, OOP, MVC architecture, TMDB API

- Built a movie dashboard from scratch on a custom Vanilla JavaScript MVC architecture, with no framework, on top of the TMDB API.
- Wrote a custom pagination engine, an LRU cache for search history and multi-level filtering and sorting.

Experience

Freelance Web Developer

Dec 2024 - Present

Self-employed, remote

- Build web applications for clients and my own products with React, Next.js and TypeScript, backed by Supabase and PostgreSQL.
- Designed and built a portfolio and booking site for a professional photographer, where clients view his work and book sessions.

English Teacher (part-time)

Sep 2024 - Present

Kindergartens and private students, online and in person. My private students use Dersly, the platform I built for them.

English Instructor

Sep 2022 - Apr 2024

BFC English Course, Baku, Azerbaijan

Dispatcher

May 2014 - Jul 2022

Transnational SL Limited (MultiChoice / DStv), Freetown, Sierra Leone

- Coordinated daily supply to dealers and handled transfers between the company's bank accounts.
- Also handled the company's IT support in the final two years, setting up and repairing staff computers.

Education and certifications

BSc Computer Science, University of the People, 2024 - 2028 (in progress)
NIIT Diploma in System Support and Maintenance, Blue Crest College, Jan 2019 - Feb 2021
Certifications: Next.js App Router Fundamentals, Vercel (Nov 2025); The Ultimate React Course, Udemy; The Complete JavaScript Course, Udemy; Next.js Course, JavaScript Mastery.
